The Product Specifications Explained

Minimum and Maximum Ticket Size

The minimum and maximum order size is the smallest and/or highest increment accepted and applicable to all order types.

Tick Value

The “Tick” is the minimum amount that the price or value of an instrument may fluctuate pursuant to the market rules of the relevant regulated market. As profit and loss is converted into the account currency, a “Tick Value” is associated with each product and automatically converted to the clients’ accounts currency. For example, if the trading account is denominated in EUR, then profit and loss will be calculated in EUR. If a client traded “FTSE100”, which is priced in GBP, our platform will automatically convert profit and loss into EUR. The conversion rate in this example, would be the EURGBP exchange rate.

Volume Step

“Volume Step” relates to the minimum order size increment accepted and applicable to all order types. For example, suppose volume size for an instrument is 0.05. In such case, Clients can trade 0.05, 0.10, 0.15 and so on lots for this instrument. However, Client will not be able to trade, 0.11 or 0.13 lots.

Contract Size

IGM FX utilizes a “Lot” based trading system, which means that all IGM FX products are aggregated into standardized trade sizes. This simplifies trading by allowing clients to trade in lot increments, and it also provides a price for each lot size rather than averaging open and close prices when multiple positions are taken in the same instrument.

Standard Leverage

Clients who have been classified as “Retail Clients” upon establishing a business relationship with IGM FX shall be granted by default the leverages set by the Cyprus Securities and Exchange Commission, which are capped **at 1:30**.

Minimum Margin Requirements

Margin requirements differ by the type of instrument and may be subject to change according to the underlying liquidity and volatility of the instrument.

Trading Hours

IGM FX trading hours for CFDs products are based on when their underlying reference markets are open, or the times liquidity providing partners are streaming prices. During session hours, clients can set pending orders, open and close trades, and to adjust price levels. IGM FX CFDs will not be open for trading during holidays in which the reference markets are closed. When the market is closed, clients will not be able to take any action on positions or pending orders.

Session Break

Clients should also be informed that CFD products may have an intraday break in addition to a daily closing time. Clients will not be able to adjust or close existing positions, or open new positions during the session break. All trading functionalities will cease upon the end of week closing.

Finance Charges - Overnight Rollover (Swaps)

IGM FX daily interest debit or credit amounts (hereafter “rollover”) are based on the total face value of the open positions and it will not be debited/credited on a position that is opened and closed on the same trading day. All open positions are rolled automatically to the next trading day. Depending on whether an order is long (buy) or short (sell), it could either be debited or credited with rollover interest daily. Please note that all open positions, on all assets offered, are subject to a 3-day rollover debit/credit at the close of business day every Wednesday. Bank holidays will affect the number of days that a position is rolled forward.

Swap Charges Calculation Formula: lots * Swap for Long or short in asset currency***Here is an example:***

Short (Sell) 0.2 Lots EURUSD. The Swap rate for Short is -48.40 EUR, and the client’s account currency EUR. Therefore, the Swap Rate Calculation: $0.2 * -48.40 \text{ EUR} = -9.68 \text{ EUR}$

Here is an example:

Buy (Long) position with 0.01 Lots on the DAX Index. The Swap rate for Long position is -180.86 EUR. The client’s account currency is in EUR.

Therefore, the Swap Rate Calculation is as follows: $0.01 * 10 \text{ (Lot Size)} * (-180.86) = -18.08 \text{ EUR}$

Contract Expiration

Trades on Futures will be closed on their ‘Expiration’ date. Clients will need to re-open their positions on the new contract manually if they wish to continue trading.

For the full list of future contract expirations please visit our website.
